HUSKY STADIUM

Photo on Page 1:

The four Ionic columns in Sylvan Grove. These columns originally graced the portico of the University's first building, which was erected in 1861 on the territorial site in downtown Seattle. They were salvaged when the building was torn down and installed on the new campus (very near the intersection of King and Pierce Lanes in the Quad) in 1911. In 1921 they were moved to their current home in Sylvan Grove. Replicas of these columns form the backdrop for our commencement stage. They remind us of our duty to preserve for future generations the priceless legacy of all those who have come before us.

The Gonfalons

Gonfalons are the banners suspended on crossbars that herald the entrance of each of the University's sixteen schools and colleges. The word derives from 12th century Florence, Italy, where each district had its own unique banner, or gonfalon. The gonfalons became symbols of state and were carried in processions by a chief magistrate or other elected official. Outstanding students are awarded the honor of carrying their school's gonfalon and leading their fellow graduates into the stadium. Our gonfalonieres this year are:

Ben Brockie, *College of Arts & Sciences*

Keil Thiessen, *College of Built Environments*

Ada Carter, *College of the Environment*

Anjali Patni, *School of Dentistry*

Camille Frances Aguilar Ungco-Santos, *College of Education*

University of Washington
a World of Good

2026 Commencement

The University of Washington, on the occasion of its one hundred fiftieth commencement, cordially welcomes all those who have come to join in ceremonies honoring the members of the graduating class of 2026.

The University, which was founded in 1861, has grown from modest beginnings in a wilderness society to become one of the world's preeminent research institutions. The more than 600,000 alumni and alumnae who have earned degrees at the University of Washington both reflect and extend its reputation as a global center of innovation and learning, a place where passion for discovery and a deep sense of social equity inspire the development of new knowledge for the common good.

Undergraduate education lies at the core of the University's mission, with over sixty percent of all students enrolled as undergraduates. At the same time, the University's exceptional faculty and facilities, the integration of advanced research and undergraduate teaching, and the availability of individualized and interdisciplinary programs, mean that graduates complete their baccalaureates not only with a firm academic foundation, but frequently with notable achievements in their chosen fields.

In graduate and professional education, a renowned faculty of scholars, researchers, artists, and visionaries is educating the next generation of doctors, lawyers, scientists, engineers, teachers, and skilled professionals. University faculty and students often work collaboratively with our region's acclaimed computer science, biotechnology, and aerospace industries to design and create a wide range of innovative technologies for the 21st century. Indeed, the University itself is an engine of economic growth, generating $21 billion annually in the state of Washington in terms of direct, indirect and induced economic impact. In the most recent Reuters ranking of world universities on innovation, UW was ranked No. 5 overall and retained its position as the most innovative public university in the U.S.

Those who graduate today will take their place among society's foremost leaders in science and the arts, education, business, law, health care, and public service, enriching the cultural vitality and well-being of peoples around the world. To the members of the class of 2026, the University extends its sincere congratulations. Their accomplishment is one in which the University takes deepest pride.

The Mace and the Medallion

University of Washington ceremonial occasions begin with the entrance of the University Mace, carried by Joseph Janes, associate professor in The Information School and University Marshal. A mace was originally a weapon used by mounted knights for self-protection. It since has become a symbol of authority indicating that the proceedings to follow have official sanction.

The University Mace bears the inscription: "Presented to the University on the occasion of its Centennial by the University of Washington Alumni Association, 1961." Its triangular headpiece is topped by a silver reproduction of Drumheller Fountain. The three sides bear engravings of the University seal, Denny Hall (the first building on the present campus), and the original University building on the Territorial campus.

The tradition of the president's seal medallion began in 1958, when Dr. Charles E. Odegaard was inaugurated as the University's twenty-fourth president. The seal medallion is worn by the President at official ceremonies, such as commencement.

On one side is the University seal with a facsimile of the four columns from the original territorial University building and the University Motto, Lux Sit, meaning "let there be light." On the other side are the words, "Seal of the President of the University."

The Academic Regalia and Founding Order

The academic dress worn by scholars originated in the Middle Ages. When European universities were taking form in the twelfth and thirteenth centuries, the scholars usually were clerics as well, and they adopted garb similar to that of their monastic orders. Buildings were cold and drafty, so caps and warm, floor-length capes with hoods were necessities. As the control of education passed from the churches, the garb was modified in various ways, and there was great diversity in color and style of cap, gown, and hood worn at the different institutions. The custom of wearing academic dress was brought to America in colonial times, but it was not until 1895 that a standardized code of academic dress was established and followed by most colleges and universities in the United States.

Both cap and gown are symbols. According to legend, the privilege of wearing a cap was the initial right of a freed Roman slave. The academic cap, therefore, has become a sign of the freedom of scholarship. The flowing gown has become symbolic of the democracy of scholarship, for it covers clothing that could indicate rank or social stratum. At the University of Washington, the bachelor's and master's gowns are black. The matching Oxford cap, or mortarboard, has a long tassel fastened to the middle of the top. The tassel is worn pendant over the left side of the cap. The colors of the tassels or hoods are distinctive of the candidate's school or college.

The doctoral gown at the University of Washington is purple with velvet facing and three bars of velvet on the sleeves. Doctoral degree candidates in Medicine, Law, Dentistry and Pharmacy wear the black professional doctoral gown with black chevrons on the sleeves. Advanced degree (doctoral and master's degree) candidates also wear the academic hood, the traditional garment that signifies high scholarly attainment. The colors of the master's and professional degree hoods are distinctive of the candidate's degree earned. The doctoral hood of bright satin purple and gold reflects the colors of the University of Washington.

Graduates enter the stadium and are presented for degree conferral according to the founding order of the schools and colleges.

The schools and colleges awarding degrees were established in: College of Arts and Sciences, 1861; College of Education, 1878; School of Pharmacy, 1894; School of Law, 1899; College of Engineering, 1901; College of the Environment, 2009 (College of Forest Resources, 1907, School of Fisheries, 1919); Graduate School, 1911; The Information School, 2001 (Graduate School of Library and Information Science, 1911); Foster School of Business, 1914; School of Nursing, 1945; School of Dentistry, 1946; School of Medicine, 1946; College of Built Environments, 2009 (College of Architecture and Urban Planning, 1957); School of Social Work, 1958; Evans School of Public Policy and Governance, 2000 (Graduate School of Public Affairs, 1962); School of Public Health, 1970.

David B. Thorud Leadership Award

Suzanne Allen, Vice Dean, Academic, Rural & Regional Affairs, School of Medicine, has received the David B. Thorud Leadership Award.

President's Medalists

The President's Medal is presented annually by the University of Washington president to graduating seniors who have achieved the most distinguished academic records in their class. On the Seattle campus, one medal is given to a student who has completed at least three-fourths of their degree requirements at the University of Washington. The other is given to a student who entered the University with at least 60 transfer credits from a Washington community college.

This year's medalists are Julia Grace Lee, of Sammamish,Washington, who is graduating *summa cum laude* with a Bachelor of Science in Nursing and Tom McAlister, of Seattle, Washington, who is graduating *summa cum laude*, with a Bachelor of Arts (Art).

Commencement Speaker

Dr. Mary Brunkow is a Distinguished Investigator at the Institute for Systems Biology (ISB) in Seattle and a proud University of Washington alumna. The University this year awarded her with the highest honor it may bestow upon an alumnus, the Alumna Summa Laude Dignata Award.

Among her many awards and accolades, Dr. Brunkow received the 2025 Nobel Prize in Physiology or Medicine with Drs. Fred Ramsdell and Shimon Sakaguchi for their landmark discoveries that reshaped modern immunology. Their work revealed how the immune system maintains tolerance to self, including identification of the FOXP3 gene and the essential role of regulatory T cells in preventing autoimmune disease, opening the door to new approaches to treating a wide range of immune-related disorders.

After earning her Bachelor of Science in biology from the UW in 1983, Brunkow completed her MS and PhD at Princeton University and conducted her postdoctoral research at the Samuel Lunenfeld Research Institute (now the Lunenfeld-Tanenbaum Research Institute) in Toronto. In 1994, she returned to Washington state to join the Darwin Molecular Corporation (later acquired by Celltech Chiroscience), a pioneering gene-discovery biotechnology company where she contributed to discoveries that presaged her Nobel-recognized work.

At ISB, Dr. Brunkow plays a central role in advancing systems biology—integrating genetics, genomics, and computational science to illuminate diseases including Alzheimer's, Huntington's, and bipolar disorder. Throughout her distinguished scientific career, she has embodied the UW's mission to advance the public good through discovery and innovation.

Dr. Brunkow resides in Seattle with her family, including her husband, Ross, and their twin daughters, Lauren and Devon.

Baccalaureate Honors

Baccalaureate Honors are based on the entire University of Washington scholastic record of each degree candidate. For members of the graduating class of 2026, the distinction of *summa cum laude* represents the top one-half of one percent (.5%) of the graduating students, *magna cum laude* the next three percent (3.0%) and *cum laude* the next six and one-half percent (6.5%). These honors are awarded to those who have completed not less than 90 credits at this institution. A single gold cord is worn by graduates who have earned these honors.

A baccalaureate honors designation for a June candidate is considered tentative and is dependent upon the student satisfactorily completing the spring quarter. June candidates are signified by an asterisk.

Rise Up With Pride For Washington

Lyrics by Catherine Henderson
Class of 2008
Music by Bill Conti

Rise up with pride for Washington
For purple and for gold
From far and wide we meet as one
As Huskies proud and bold

Chorus
Washington we hail to thee
Honor, truth, integrity
Forever shine from lake to shore
Your light upon us ever more.

Rise up with pride for Washington
Together hand in hand
We will proclaim our loyalty
In song throughout the land

Chorus
Washington we hail to thee
Honor, truth, integrity
Forever shine from lake to shore
Your light upon us ever more.
